

Environmental Management System

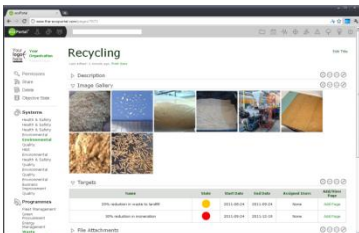

ecoPortal makes managing environmental sustainability easy. It gives you a single view of all that is going on in your organisation and provides you with the tools to measure and improve your performance. You can be confident that you are doing the right things and your customers will reward you for that.

Benefits of using ecoPortal

- Reduces the cost and complexity of achieving environmental certification such as ISO 14001
- Helps you manage other certifications such as Enviro-Mark®NZ and Eco Warranty etc.
- Makes reporting and communicating your objectives and achievements effortless
- Puts you in control of operating costs like energy and waste by making it easy to measure and manage improvement projects
- Provides you with high levels of control and coordination across geographically scattered sites
- Generates excitement and commitment to environmental targets
- Prevents overloading management with another inefficient paper-based system
- Easily integrates with other management systems like quality and health & safety
- Provides a systematic framework for translating your sustainability vision into manageable projects

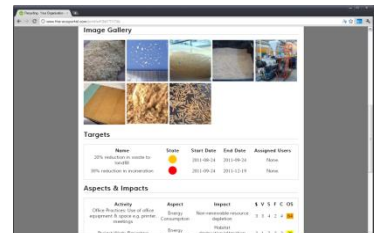

All on an easy-to-use online system

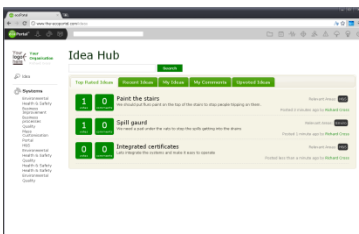

Information at your fingertips
